

### **Course Introduction**

Business disruption is difficult to predict but can be mitigated if well prepared. Among those disruptions, some may turn to disaster which even more difficult to handle without a plan. In recent years, many examples of disaster have shown us the loss in lives, assets, and even company's reputation. There are standards that help organizations to achieve a plan to cope with disasters, and one of them is ISO22301, The Business Continuity Management System.

This course is an intensive 2-days course that teaches the principles of Business Continuity Planning (BCP) and practical methods to develop, test, and maintain your business continuity plan.

### **Course Objectives**

- To establish the knowledge in BC program lifecycle processes within the organization.
- To make capable of conducting the Business Impact Analysis (BIA).
- To cost-effectively identify and select BC recovery strategies.
- To develop skills in writing a BCP document.
- To understand an effective test plan for BCP testing.
- To understand processes on maintaining the BC plan.
