

COBF - CobiT Foundation Course (Official Course by ITPreneurs)

Course Introduction

The COBIT® Foundation course is a 3-day, interactive, classroom-based learning experience. Participants learn about the need for an IT control framework and how COBIT addresses this need by providing a globally accepted IT governance and control framework. This course explains the elements and supporting materials of the COBIT framework using a logical and example-driven approach for everyone interested in obtaining Foundation-level knowledge of COBIT.

Course Objectives

- Identifying how IT management issues affect organizations.
- Recognizing the need for a control framework driven by the need for IT governance.
- Understanding the principles of IT governance, how IT governance helps address IT management issues, and who should be responsible for IT governance.
- Identifying how COBIT meets the requirement for an IT governance framework.
- Understanding how COBIT is used with other standards and best practices.
- Identifying the COBIT Framework and all its components — control objectives, control practices, and management guidelines.
- Understanding how to apply COBIT in a practical situation.
- Identifying the functions that COBIT provides and the benefits of using COBIT.
- Identifying how the use of COBIT is supported by ISACA.

Learning Level

- Foundation

Course Duration

- 3 Days

Prerequisite Courses

There are no formal prerequisites; it is recommended that participants have experience in the IT governance domain.

Target Group

- A wide range of business managers, IT management consultants, IT governance professionals, and auditors who wish to gain a better understanding of COBIT and what it can provide to their organization
