

## Course Introduction

Business disruption is difficult to predict but can be mitigated if well prepared. Among those disruptions, some may turn to disaster which even more difficult to handle without a plan. In recent years, many examples of disaster have shown us the loss in lives, assets, and even company is reputation. There are standards that help organizations to achieve a plan to cope with disasters, and one of them is ISO22301, The Business Continuity Management System.

This course is an intensive 2-days course that teaches the principles of Business Continuity Planning (BCP) and practical methods to develop, test, and maintain your business continuity plan.

## Course Objectives

- To establish the knowledge in BC program lifecycle processes within the organization.
