

Course Introduction

Are you prepared after the Phase 2 of the outbreak? If not, this is the last chance. COVIT 19 is far more dangerous than you think.

Business disruption is difficult to predict but can be mitigated if well prepared. Among those disruptions, some may turn to disaster which even more difficult to handle without a plan. In recent years, many examples of disaster have shown us the loss in lives, assets, and even company's reputation. There are standards that help organizations to achieve a plan to cope with disasters, and one of them is ISO22301, The Business Continuity Management System.

This course is an intensive 2-days course that teaches the principles of Business Continuity Planning (BCP) and practical methods to develop, test, and maintain your business continuity plan.

Course Objectives

Upon completion of this course, students should be able to:

- To establish the knowledge in BC program lifecycle processes within the organization.
- To make capable of conducting the Business Impact Analysis (BIA).
- To cost-effectively identify and select BC recovery strategies.
- To develop skills in writing a BCP document.
- To understand an effective test plan for BCP testing.
- To understand processes on maintaining the BC plan.
