Course Introduction

This 4-days course is not an official ISACA training course; however, it is led by a Certified Information Systems Auditor (CISA) with over a decade of experience and familiarity with the ISACA resources. The training material is built from the latest version of review manual and QAE books but reorganized into an easy-to-understand format. This course is a combination of exam review and introduction to essential standards and leading practices related to information systems audit, for example, IT Audit Framework (ITAF) and ISO 19011.

Course Objectives
