Course Introduction

This 3-days course is not an official ISACA training course; however, it is led by a Certified Information Security Manager (CISM) with over a decade of experience and familiarity with the ISACA resources. The training material is built from the latest version of review manual and QAE books but reorganized into an easy-to-understand format. This course is a combination of exam review and introduction to essential standards and leading practices related to information security, for example, ISO/IEC 27002 and NIST Special Publication 800-53.
