Course Introduction

This 3-days course is not an official ISACA training course; however, it is led by a Certified in Risk and Information Systems Control (CRISC) with over a decade of experience and familiarity with the ISACA resources. The training material is built from the latest version of review manual and QAE books but reorganized into an easy-to-understand format. This course is a combination of exam review and introduction to essential standards and leading practices related to IT risk management, for example, Risk IT Framework and ISO 31000.
