

Course Introduction

ITIL - the Information Technology Infrastructure Library is the conglomerate of Best Practices from several Industry sector and world class company. It is derived from BS 15000 British Institution's Institution Standard for IT Service Management. With Vendor- neutral concept and non-proprietary source, ITIL is accepted from top companies. Currently ITIL version is Version 4. Not only adding several topics to ITIL v3 but also rearranging them make ITIL more useful and ready for rapid need for change of services.

This course introduces the concepts of IT Service Management (ITSM) based on the IT Infrastructure Library (ITIL). It describes a set of processes involved in developing an IT framework and features the exciting and hands-on High Performance simulation that provides an interactive learning experience throughout the course. This results in a thorough grounding in the basic theory of ITSM, which can be used to take the Foundation Certificate in IT Service Management, or to participate in ITSM projects at any level. (Taking the exam is optional.)

Course Objectives

- Understand Key Concepts of Service Management & Key Concepts
- Identify opportunities to develop ITIL practices using
- Interact with IT teams using ITIL terminology and concepts

Course Highlights

The IT Infrastructure Library is the current version of the most widely adopted best practice framework for IT management. Achieving the Foundation Certification represents clear demonstration that you can contribute to improving the maturity of an IT organization. The unique structure and format of this course follows the guidelines of the testing body and provides comprehensive coverage of the ITIL v4 Foundation Certification Exam topics.

This ITIL course takes you through the service value system and what it really means to contribute to business value.
