

Course Introduction

Project Delay, Over Budget, Communication Problem in Project, or even Project Fail. These problems are usually rooted from poor Project Management or non-standard Project Management. Sometimes there is no project management at all.

This course will give you standard for project management. Help you get your project on track. It also helps you make your project more manageable. This course is good for any project participant and it is a must for new Project manager, old project manager who never take the standard Project Management course or “the to be project manager” such as senior computer professional.

Examples in this course will focus on Computer/Information System Development and Computer/Information Security Development.
